PROFESSIONAL SUMMARY

B.Tech CSE undergraduate with hands-on experience in **Java, JavaScript, React, and Application development**. Led 3 full-stack projects from design to development. Seeking roles in Software development.

SKILLS & PROGRAMMING LANGUAGES

Technical Skills: Java, JavaScript, React.js, Data Structures, DBMS (SQL)

Tools & Technologies: Figma (UI/UX), Git & GitHub, Ollama (LLM), VSCode, IntelliJ IDEA

EDUCATION

B.Tech – CSE | Sri Manakula Vinayagar Engineering College 2023 – 2027

CGPA: 8.41 / 10.0 (up to 5th semester)

HSC (XII) | Nivedha Matric. Higher Secondary School 2022 – 2023

Marks: 525/600 | Percentage: 87.5%

SSLC (X) | Jeevanandam Govt. Higher Secondary School 2020 – 2021

Percentage: 85%

INTERNSHIPS

Software Development Intern | [LINK](#)

2026

GodParticles

Adayar, Chennai

- Developed a web-based SAP Invoice Generator application under the finance module using React, Flask, and SQL.
- Designed and implemented invoice creation, management, and PDF export workflows with automated tax and total calculations.
- Collaborated with the finance team to map real-world SAP invoice processes into a functional web interface.

Technologies Used: React, Flask, SQL

AI Full-Stack Development Intern | [LINK](#)

2026

Infosys Springboard

Remote

- Built a personalized AI content creator integrating 3 Large Language Models (LLMs) with a full-stack architecture using React and Flask.
- Implemented prompt-engineering pipelines and dynamic content generation features for end users.
- Delivered a fully functional web application meeting the project brief within the stipulated timeline.

Technologies Used: React, Flask, LLMs(OpenAI, Gemini, Mistral), Python

PROJECTS

Smart Train Ticket Verification System | [LINK](#)

2023

Team Lead | React, Firebase, Flask, Java

- Led a team of 4 to build a web & Android app for real-time ticket verification with OTP login, live seat maps, and unauthorized entry alerts.
- Won 1st place at Innovators Day project competition, Sri Manakula Vinayagar Engineering College, Puducherry.

FactoryGuard – Industrial Predictive Maintenance Platform | [LINK](#)

2026

Data Engineering | Python, Flask, Machine Learning

- Engineered a predictive maintenance solution that processes machine telemetry and sensor data to forecast equipment failures and reduce unplanned downtime.
- Implemented data preprocessing, feature extraction, and machine learning pipelines with imbalance handling techniques to improve failure prediction accuracy.

ACHIEVEMENTS

- Hackathons (7+): 1st place – Innovators Day Project Presentation, SMVEC, Puducherry.
- Paper Presentation (3+): 2nd place – SCIENSEA'24, Kongu Engineering College, Erode.
- Project Expo (4+): Top 10 – INAE Youth Conclave, Anurag University, Hyderabad.
